## Technical Skills

---

- **Programming Languages:** Java, Python
- **Frontend Technologies:** HTML, CSS, JavaScript, React.js, Bootstrap
- **Backend Technologies:** Spring Boot
- **Database:** MySQL
- **Version Control:** Git, GitHub
- **Software Concepts:** OOPs, Multithreading

## Projects

---

### Employee Management System

GitHub

**Technologies:** Spring Boot, React.js, MySQL

- Developed an employee management system with CRUD operations for adding, updating, viewing, and deleting employee records.
- Implemented backend logic using Spring Boot and integrated MySQL for secure data storage and management.
- Designed a responsive frontend using React.js to improve user interaction and maintainability.

### Food Recipe Website

GitHub

**Technologies:** HTML, CSS, JavaScript, React.js

- Developed a responsive food recipe website where users can search recipes and view recipe details.
- Implemented recipe cards with images, cooking time, ratings, ingredients, and step-by-step cooking instructions.
- Added favorites functionality to save and remove selected recipes and created a simple recipe assistant chatbox.

### LotusReads - Book Store Website

GitHub

**Technologies:** React.js, JavaScript, Tailwind CSS, React Router, LocalStorage

- Built a responsive book store web application with user signup, login, book categories, favorites, cart, and book details pages.
- Implemented LocalStorage-based authentication to store user data, current user, favorite books, cart items, and theme preferences.
- Added search, category filtering, dark/light mode, responsive design, animations, and hover effects to improve user experience.

## Internship

---

### Java Full Stack Developer Intern

Tap Academy — MAY-06-2026

- Gained hands-on training in Java Full Stack Development.
- Worked on Java, Spring Boot, React.js, MySQL, HTML, CSS, and JavaScript.
- Developed practical understanding of full-stack application development, database connectivity, debugging, testing, and troubleshooting.
- Built responsive user interfaces using React.js components and implemented client-side routing using React Router.
- Practiced REST API integration, form handling, state management, and CRUD operations in full-stack applications.

## Certifications

---

- Infosys Springboard – Programming using Java Certificate
- Infosys Springboard – Database Management System Certificate

## Education

---

**B.Tech in Computer Science Engineering**  
CGPA: 8.7

Rajiv Gandhi University of Knowledge Technologies, Ongole  
Year of Pass Out: 2026
